Collapsible Tree Plugin

In this blog we will talk about the Collapsible Tree custom visualization plugin. It is a representative of D3's family of hierarchical layouts.

It is designed to produce a 'node-link' diagram that lays out the connection between nodes in a method that displays the relationship of one node to another in a parent-child fashion.

The collapsible tree plugin can be downloaded from the [Oracle BI Public Store](#).

Are you an Oracle Analytics customer or user?

We want to hear your story!

Please voice your experience and provide feedback with a [quick product review for Oracle Analytics Cloud](#)!
